

It is indeed one of the well-known eCommerce sites in the world- Amazon.

This is the reason why millions of marketers are interested in getting an affiliate business in Amazon. As big market as it is, the biggest challenge of marketers is still driving tons of traffic into their site to be able to get more sales and commissions.

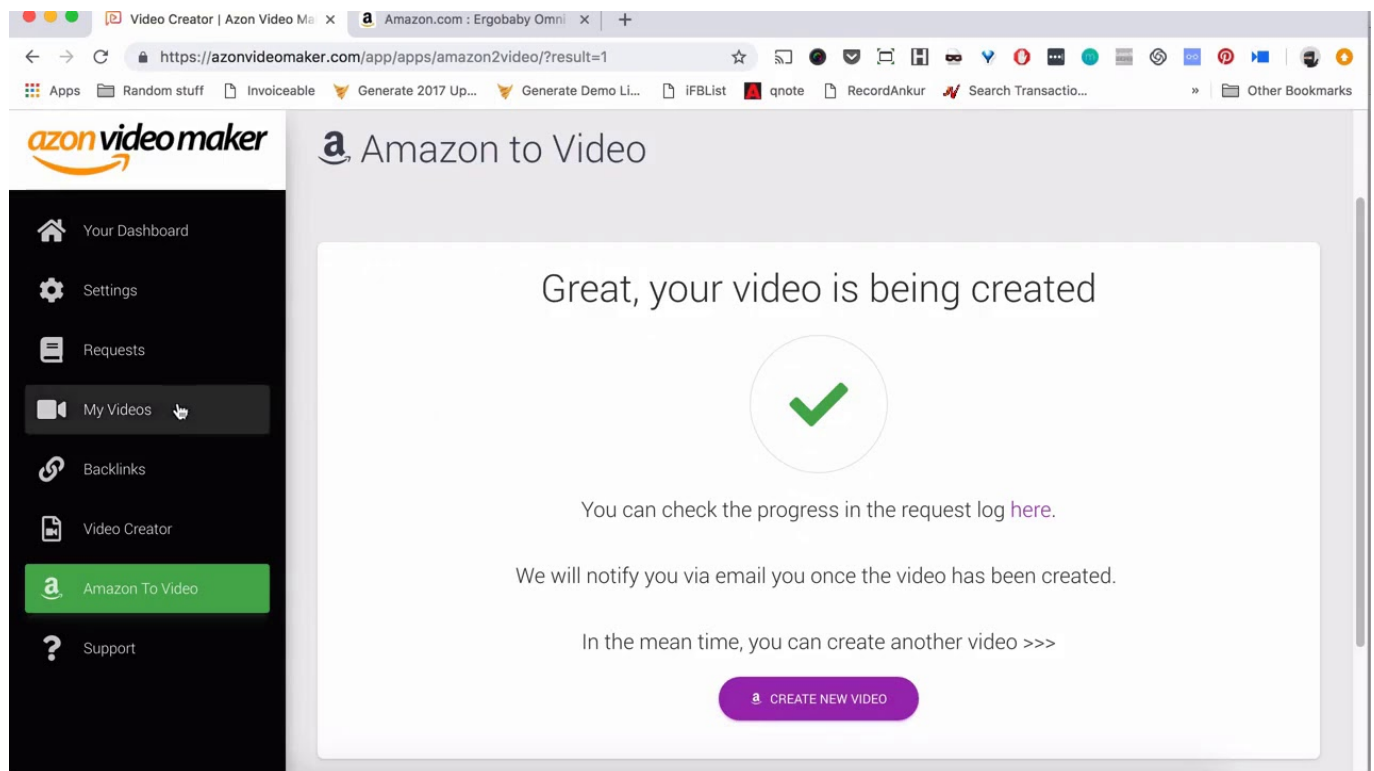

Some are still sticking with a method of ranking their sites on Google. This is the sad part for me because Google is not the only platform in driving massive traffic. Yes, you are right! I'm talking about Youtube. It is named as Google's little brother.
